Preferred Frameworks and Libraries

React, React Native, Expo, Next.js, Typescript, Storybook, Node.js, Tailwind CSS, Motion, Capacitor, Chart.js

React-specific Experience:

React hooks, Code-splitting, Render optimizations, Context, Redux, Tanstack Query, Zustand, Figma-to-React, Tanstack Router, Progressive Web Application (PWA) deployment

Testing, Processes and Code Quality:

Full-cycle dev processes: Code reviews, scrum and kanban project management, agile development, Continuous Integration (CI), unit and integration testing, JEST testing library. AI-Augmented software development (2025-2026)

CD Pipelines and Tools:

Github projects, JIRA ticket management and response. Vercel, Supabase, Firebase, Resend, Contentful, Agentic AI implementation, API development

Product-oriented senior full-stack engineer with 6 years of software development experience in top-tier companies. My passion is in working with and building startups. During the past decade, I've worked with multiple tech startups in a range of industries from financial investment to chemical process engineering with headquarters spanning New York to Cambridge. Had the privilege of working with companies through acquisition and helping companies acquire millions of dollars in funding while building software platforms from early conception.

Work Experience

2025 – Oct – **Lead Product Engineer**

2026 – Mar *Vailo AI, Dubai, United Arab Emirates (Full-Time Remote)*

6 months

- Built CI/CD pipelines and A/B testing capabilities to reduce frontend deployments from a few hours to a few minutes
- Translated Figma designs into a custom, accessibility standards-compliant React component library with Storybook documentation
- Designed and implemented data models on Contentful CMS for non-technical team members
- Prepared the platform for i18n integration and localization
- Identified key areas of UX improvement and managed task creation and tracking
- Owned all frontend features and architecture, from state management to routing, and built PWA features for mobile device users
- Integrated cross-site authentication persistence for the business's SPA and marketing site – [Website →](#)

2024 – Oct – **Senior Software Engineer, Frontend-Focused**

2025 – Jan *ReactWise YC S24, Cambridge, UK (Contract, Remote)*

4 months

- Joined early and redesigned the entire user interface with a more intuitive UX, adding animations, improved navigation displays, breadcrumbs, layout and routing logic
- Refactored the platform from a Next.js framework to a React + Vite framework
- Integrated new APIs from a reworked backend architecture
- Helped the company acquire more than \$1M in funding and investment – [Website →](#)

- 2023 – Sep
–
2023 – Dec
4 months
- Software Engineer**
Blockscope YC S22, San Francisco, US (Contract, Remote)
- Improved the UI/UX and DX of several of the platform's key pages and components by designing data placeholders, icons and optimized state management
 - Built out documentation for API products and user-facing components for testing endpoints and converting JSON into request and response schema explanations
 - Implemented landing pages for solutions and products
 - React • Redux • Zustand – [Website →](#)
- 2022 – Nov
–
2023 – May
6 months
- Software Developer**
Freeport, New York (Contract, Remote)
- Early-stage website overhaul
 - Translation of Figma designs to React components
 - Blog overhaul
 - Scalable pagination system
 - SEO configuration
 - Contentful API integration
 - Form validation (Zod, frontend and server-side)
 - Google Places API integration
 - Address parsing (KYC)
 - React.js • Next.js • Tailwind CSS – [Website →](#) – [Article →](#)
- 2022 – Jan –
2022 – Sep
10 months
- Software Developer**
Gemini Trust Company LLC, New York (Full-time, Remote with on-site attendance for events)
- Software-as-a-service (SASS) development
 - Overhaul of BITRIA's existing onboarding process
 - Integration with Gemini KYC process and database
 - Storybook UI and TypeScript migration
 - Full-cycle development process
 - Incident response
 - Representational State Transfer (REST)
 - HTML • CSS • React.js • Docker • Django • FastAPI – [Demo Video →](#)
- 2020 – May
–
2021 – Dec
1 year,
8 months
- Front End Developer**
BITRIA, Inc (Acquired by GEMINI), San Francisco (Full-time, Remote)
- Software-as-a-service (SASS) development
 - Designed and developed a robust panel user experience to facilitate a seamless top-down flow from firm to account level
 - Conducted thorough reviews of the front end UX to dramatically improve the platform's aesthetics and usability
 - Worked with the product team to map out and design the onboarding process and experience, as well as white labeling capabilities for custom branding of the platform
 - Built icon functionality for the platform's supported assets and extended the functionality of several commonly used UI components
 - Full-cycle development process
 - Incident response
 - Representational State Transfer (REST) integration
 - HTML • CSS • React.js • Docker • Django – [Demo Video →](#)
- 2013 – Jul
2016 – Jun
2 years,
4 months
- Front End Web Developer**
EMS Asia Pacific Pte. Ltd, Singapore (Contract, Freelance)
- Created and maintained responsive mobile and desktop online marketing materials for themed blockbuster exhibits and live entertainment productions
 - HTML • CSS • JavaScript – [Archived 1 →](#) – [Archived 2 →](#)
- 2014 – Nov
2015 – Jul
9 months
- Project Delivery Manager**
Mirrior Technologies, Singapore (Full-time, On-site)
- Led a small web development team in the design, coding and implementation of various WordPress and mobile app projects for more than 30 small businesses and individuals.
 - Managed delivery times for the agency's clients.
 - Attended meetings with clients and managed their web hosting, domain name configuration, and feature requests. [Design Showcase →](#) – [LinkedIn →](#)

Independent Projects

AKAMI: AI-Powered Astrology Assistant

• Generates daily horoscopes using OpenAI's GPT-4o model • Realistic text-to-speech audio playback • Intelligently caches and stores GPT-generated data for new users and offline use • Expo React Native • Supabase • Google Cloud API • OpenAI API • Text-To-Speech API • Zustand - [Website →](#)

Gregsuzuki.bio

• Next.js • Tailwind CSS • Responsive Design • HTML5 • Single Page Application - [Website →](#)

Formal Education

Certifications

2001 – 08 – **Singapore American School**
2008 – 06 High School, Advanced Placement Program

2020 – 02 – **HK University of Science and Technology** (Online)
2020 – 05 Full-Stack Web Development with React Specialization
<https://bit.ly/cert-react>

2009 – 08 – **Drake University** (Des Moines, IA)
2012 – 03 Law, Politics & Society (B.A.
Postponed)

2020 – 01 – **IBM Skills Network** (Online)
2020 – 03 Databases and SQL for Data Science with Python
