## PROFILE

Product-oriented full-stack engineer with 6+ years of professional software development and a decade of building for the web. I do my best work at early-stage startups, taking platforms from first concept to production. I've worked across fintech, Web3, chemical process engineering and AI data infrastructure for companies headquartered from New York and San Francisco to Cambridge, Dubai and Singapore. Along the way I've helped one company through an **acquisition**, helped others raise **$1M+ in funding**, and most recently built the platform behind a **$2.5M contract with a frontier AI lab**.

## SKILLS

| | |
|---|---|
| **Frameworks** | TypeScript, JavaScript, React, React Native, Expo, Next.js, Vite, Node.js, Tailwind CSS, Storybook, Motion, Capacitor, Chart.js |
| **React depth** | Hooks, Context, Redux, Zustand, TanStack Query & Router, code-splitting, render optimisation, Figma-to-React, PWAs |
| **AI & data** | LLM tool use & agentic pipelines, model routing, prompt caching, LLM-powered quality control, metadata extraction, data ingestion & video processing, Anthropic & OpenAI APIs |
| **Backend & platform** | API design & development, REST, Fastify, Supabase, Firebase, Contentful, Resend, Vercel, Docker, Django, FastAPI, SQL, ID verification / KYC |
| **Process & quality** | CI/CD, A/B testing, Jest unit & integration testing, code review, Scrum & Kanban, GitHub Projects, Jira, i18n, accessibility (a11y), AI-augmented development |

## EXPERIENCE

May 2026 – Present
CURRENT

### Enterprise Solutions Architect, TaskAlpha · Nexscient®

Singapore · Consultancy, remote

- Within the first few weeks, architected and shipped the foundational infrastructure for a new data ingestion pipeline: the user interface, API layer and end-to-end video processing system.
- Built automated metadata extraction and LLM-powered quality-control checks that power large-scale structured data collection.
- Built integrated ID verification plus scalable directories and tooling for a distributed, multi-tier network of contributors, partners, annotators and reviewers.
- Secured a **$2.5M contract with a frontier AI lab** on the strength of the platform.

Oct 2025 – Mar 2026

### Lead Product Engineer · Vailo AI

Dubai, UAE · Consultancy, remote

- Owned all frontend features and architecture, from state management to routing, including PWA features for mobile users.
- Built CI/CD pipelines and A/B testing capabilities, cutting frontend deployments **from hours to minutes**.
- Translated Figma designs into a custom, accessibility-compliant React component library with Storybook documentation, built from scratch.
- Designed Contentful CMS data models so non-technical teammates could manage content; prepared the platform for i18n and localisation.
- Integrated cross-site authentication persistence between the product SPA and marketing site; identified key UX improvements and managed task tracking.

Oct 2024 – Jan 2025

### Senior Software Engineer, Frontend · ReactWise YC S24

Cambridge, UK · Contract, remote

- Joined early and redesigned the entire user interface for a more intuitive UX: animations, clearer navigation, breadcrumbs, layout and routing logic.
- Migrated the platform from Next.js to React + Vite and integrated new APIs from a reworked backend architecture.
- Helped the company raise **more than $1M** in funding and investment.

React · Next.js · Vite · TypeScript

---

Sep 2023 – Dec 2023

### Software Engineer · Blockscope YC S22

San Francisco, US · Contract, remote

- Improved the UI/UX and developer experience of key pages and components with data placeholders, icons and optimised state management; built product landing pages.
- Built API product documentation and components for testing endpoints and explaining request/response schemas.

React · Redux · Zustand

---

Nov 2022 – May 2023

### Software Developer · Freeport

New York, US · Contract, remote

- Delivered an early-stage website and blog overhaul, translating Figma designs into React components with SEO configuration and a scalable pagination system.
- Integrated the Contentful and Google Places APIs, with address parsing for KYC and Zod form validation on both client and server.

React · Next.js · Tailwind CSS · Zod Press coverage →

---

Jan 2022 – Sep 2022

### Software Developer · Gemini Trust Company

New York, US · Full-time, remote with on-site events

- Overhauled BITRIA's onboarding process and integrated it with Gemini's KYC process and database.
- Contributed to the Storybook UI and TypeScript migration, full-cycle SaaS development and incident response.

React · TypeScript · REST · Docker · Django · FastAPI Demo video →

---

May 2020 – Dec 2021

### Front End Developer · BITRIA, Inc. Acquired by Gemini

San Francisco, US · Full-time, remote

- Designed and built a panel experience giving a seamless top-down flow from firm to account level, and ran frontend UX reviews that substantially improved the platform's look and usability.
- Worked with product to design onboarding and white-labelling for custom client branding; built asset icon support and extended widely used UI components.

React · REST · Docker · Django · HTML/CSS Demo video →

---

2013 – 2016

### Earlier experience · Singapore

- **Front End Web Developer**, EMS Asia Pacific Pte. Ltd. (Contract, Jul 2013 – Jun 2016): built responsive marketing sites for blockbuster exhibitions and live entertainment productions. Archives: 2014 · 2015
- **Project Delivery Manager**, Mirrion Technologies (Full-time, Nov 2014 – Jul 2015): led a small team shipping WordPress sites and mobile apps for 30+ small businesses and individuals; managed client delivery. Design showcase →

## EDUCATION & CERTIFICATIONS

**Drake University, Des Moines, IA**
Law, Politics & Society (B.A., postponed) · 2009 – 2012

**Singapore American School**
High School, Advanced Placement Program · 2001 – 2008

**Full-Stack Web Development with React**
HKUST (online) · 2020 · Credential →

**Databases and SQL for Data Science with Python**
IBM Skills Network (online) · 2020 · Credential →
